Meet the 2018 Laureates of Stockholm Water Prize

“They have revolutionized treatment of water for safe drinking, and refined purification of polluted water for release or reuse – all while minimizing the energy footprint”.

Welcome to an inspiring morning talk with professors Mark van Loosdrecht and Bruce Rittmann, this year’s winners of the Stockholm Water Prize. Water is one of humankind’s great challenges for sustainable development. During this open lecture we will hear the Laureates talk about how their research makes a difference. How do we need to manage this precious resource, now and in the future?

28 August, 0900-1030, ÅNGDOMEN, KTH Library, Osquars backe 31

PROGRAMME

09.00   Introduction
        David Nilsson, Director of WaterCentre@KTH
        Mark van Loosdrecht, Delft TU
        Bruce Rittmann, Arizona State University
        Comments and discussion
        Elzbieta Plaza, KTH
        Elin Eriksson/Maximilian Lüdtke (tbc), IVL

10.15  A Swedish Fika at WaterCentre, Teknikringen 10B
